CRICKET WICKET LOAMS and TURF DRESSING

Boughton County Cricket Dressing

Sterilised, screened and sifted to a very high standard.

A loam with typical clay content above 30% giving a firm true pitch able to last at least four days at

a County Cricket level or to give a better surface to a higher standard Club

102053 County Loam 25kgs £ 6.20

Boughton Club Cricket Dressing

Sterilised, screened and sifted to a very high standard.

A loam with a typical clay content of between 25% - 28%. Club loam is used at clubs that need a true firm pitch but do not have the resources to cope with a higher clay content.

102054 Club Loam 25kgs £ 5.99

KaLoam Original

County and Club quality cricket pitch dressing.

Use for cricket wicket dressing and construction. The 32% clay content which gives Kaloam a high binding

strength, producing pitches of pace, bounce and reliable performance.

102014 KaLoam 25kgs £ 5.49

Kettering Loam

A loam with a typical clay content of 24%. This loam has been the main stay of village green and school cricket pitches for many years. It is an ideal loam where a pitch is required to give a

good surface while receiving a minimal amount of preparation.

102329 Kettering Loam 25kgs £ 4.99

InterHort Turf Dressing

Our Turf Dressing is a 70% lime free sand and 30% sterilised loam mixture which is screened down to 3mm. This is a very high quality product with 1000's of bags sold every year.

Apply in Spring or Autumn at 1 to 2kgs per mtr²

102034 Turf Dressing 25ltr £ 3.38

MULTI-PALLET DISCOUNTS AVAILABLE - PLEASE ENQUIRE

DLF offers one of the world's largest research and breeding programmes for both turf and forage, and they work continually to improve the quality and reliability of all varieties.

All seeds are treated with **GroMax** - a dry formulation of natural humates and humic acids, seaweed extract, a proprietary blend of natural sugars (sucrose), vitamins (B complex & K) soluble potash and buffering agents.

Soil Analysis Service

A simple soil test can reveal a multitude of problems - but by having this invaluable information you can tailor your fertiliser program to give your grass the best possible level of nutrition - we can help you with this

"This is the only true way to determine your fertiliser requirements"

Please call for prices and test information

Maxicrop Liquid Feeds

Bio-stimulant products improve soil and plant productivity, ensuring top performance in a range of situations.

FINE TURF NO.4 - In season turf stimulant with nitrogen and potash to provide a rapid fertiliser response in top growth with minimal scorch effect.
ANALYSIS: N12 - P0 - K6 Size: 10ltr

MOSS KILLER & CONDITIONER is a seaweed extract with added ferrous sulphate. Simply mix with water in a watering can or sprayer & saturate moss to kill quickly and efficiently.
ANALYSIS: N2 - P0 - K0 + 16.4%Fe Size: 10ltr

CODE	DETAIL	EACH £
128014S	Fine Turf Covers 1'512m ²	34.68
128012S	Mosskiller Covers 360m ²	32.40

Vitax 50/50 Liquid Feeds

Low cost, fast acting liquid developed for use on sports and amenity turf. Foliar and root absorption reduces the risk of leaching and ensures that nutrients are taken up by the plants. Ideal for use in dry conditions, on newly laid turf and freshly germinated seed. **Size 20ltr**

Apply at 60ltr/ha or 600ml per 100m²

CODE	DETAIL	EACH £
102062	N18-P3-K6 - 20ltr	46.66
102061	N18-P0-K0 - 20ltr	46.66
102063	N5-P4-K20 - 20ltr	48.99

Lawn Sand Mosskiller

The nitrogen content will give a quick green up effect as it stimulates the grass whilst the Iron Sulphate kills the moss.

Analysis:
N5 - P0 - K0 + 2%Fe

Apply 140gms per m²
Covers 180m²

Order over £1000 ex.vat - Get 20% off prices shown

Vitax Ultraflow

LIQUID: A concentrated, long-term, non-ionic, wetting agent that stays active for the entire growing season. For use on ornamental and sports turf. Highly effective wetting action persists for up to 12 months eliminating extra treatments.

GRANULAR: ideal for the treatment of specific problem areas, including bunker banks and exposed windy areas where liquid application is a problem.

TABLETS: Each tablet lasts approx 30 minutes. Each 250gm tablet is sufficient to tackle dry areas on up to five golf greens.

CODE	DETAIL	EACH £
102069	10ltr - Treats 2'000m ²	168.99
102111	15kgs - Treats 500m ²	87.50
102176S	250gm - Spot Treatment	16.99

Headland Cyren

Highly effective leatherjacket control throughout their period of activity. Remains in the upper soil surface, where the leatherjackets are, and is not subject to leaching. Effective also against frit fly larvae feeding close to the soil surface.

Contains: 480g per litre (44.65% w/w) chlorpyrifos

CODE	DETAIL	EACH £
102038	1ltr - Treats 6'600m ²	25.95
102037	5ltr - Treats 33'000m ²	75.38

Merit Turf

For
Leatherjackets
& Chafer Grubs

Is an insecticide for the control of Chafer Grubs and Leatherjackets. Long term curative and prevention from one application per year. 50% improvement to turf quality. Very low dose rate. Low risk to operator and non-target organisms.

Contains 5g/Kg imidacloprid

CODE	DETAIL	EACH £
102043	5kgs - Treats 1'667m ²	145.86

Caste Off

Effective product for wormcast suppression. Earthworm casts result from the deposition of earth and decomposing matter. There are 25 commonly found species of earthworm in the UK, only three of these are responsible for the majority of casts.

Contains: 500g/l Carbenazim

CODE	DETAIL	EACH £
102049	5ltr - Treats 12500m ²	99.40

Bayer Chipco Green

Provides exceptional curative and preventative control against Fusarium and Red Thread. It's special liquid formulation is very 'rainfast' and can also prevent the build-up of morning dew on grass. 'Switching' to remove this dew is therefore usually unnecessary. Contains: 250g/l (24.3%w/w) iprodione.

CODE	DETAIL	EACH £
102083	5ltr - Treats 2'500m ²	265.00

Vitax Esteem

Outstanding control of difficult weeds in amenity turf, whilst maintaining excellent safety to turf grass species. Very powerful 3 - way mix of herbicides. Controls a broad spectrum of weeds. Re-seeding possible after 6 weeks.

Active Ingredients: Clopyralid 35 g/l + MCPA 175 g/l + 2,4-D 150g/l

CODE	DETAIL	EACH £
102287	2ltr - Treats 6'666m ²	69.95

Headland Relay Turf

Highly active against a wide range of broad leaved weeds in both fine and coarse turf. Broad spectrum selective weed control. High Mecoprop-P content means outstanding control and often results in optimum kill after single application.

Contains 200g/l Mecoprop-P, 200g/l MCPA and 25g/l Dicamba. Covers: 10'000m²

CODE	DETAIL	EACH £
102128	5ltr - Treats 10'000m ²	65.58

Scotts Praxys

Praxys rapidly enters target weeds, travelling through the whole plant to give complete weed destruction. Selective, systemic post-emergence herbicide for managed amenity turf, lawns and amenity Grassland.

Active Ingredients: 80g /l clopyralid, 2.5g /l florasulam and 100.000 g/l fluroxypyr.

CODE	DETAIL	EACH £
102310	2ltr - Treats 20'000m ²	136.78

Jewel Herbicide & Mosskiller

Jewel is the first **weed and mosskiller** on the market. Jewel has a post emergence contact activity with Carfentrazone-ethyl and a systemic activity with Mecoprop-P. It can be used on all turf grass species.

Active Ingredients: 1.5% w/w carfentrazone-ethyl and 60% w/w mecoprop-P.

CODE	DETAIL	EACH £
102133	1.5kgs - Treats 10'000m ²	142.48

Errors and Omissions Excepted

Our main business is the supply of bulk orders on pallets, and we offer a minimum order value of £150.00 + vat for **FREE DELIVERY** to 75% of UK postcodes.

We also send out smaller parcel orders with a surcharge (if under £150 + vat) of £6.95 + vat per parcel weighing up to 30kgs.

As we send anything from a single parcel to articulated lorry loads, it is difficult to show all delivery options or surcharges - so please call our helpful sales team, who will provide you, with all the information to get the best possible deal.

The table below shows the areas that will incur pallet delivery surcharges

These postcodes will incur a £20.00 + vat surcharge per every 1000kgs	We cannot deliver to these postcodes without quoting
